

An FS-ISAC member has requested member participation in a survey on DDoS Experience and Technology. Primary Points of Contact will be the only persons receiving the invitation. The FS-ISAC hopes that the one-invitation-per-institution approach will increase the quality of the data we receive, but we rely on POCs to take an active role in the survey process.

The purpose of this survey is to assist member organizations in preparing for DDoS attacks by gaining an understanding of members' experience with DDoS attacks and the detection/prevention technology currently in use. We are using SurveyMonkey for this survey. The invitation will come from [fsisac@surveymonkey.com](mailto:fsisac@surveymonkey.com). The survey link is uniquely tied to this survey and your email address. Please do NOT forward the SurveyMonkey invitation. If you need to consult with your internal subject matter experts before completing this survey, the survey questions are available as FS-ISAC Survey on DDoS Experience and Technology.pdf under the Documents tab, Survey folder in the FS-ISAC portal. Please do not return the .docx form to the ISAC. The form is intended to help you obtain feedback so you can better complete the survey yourself.

The survey is being sent to FS-ISAC Basic, Core, Standard, Premier, Gold and Platinum member institution Points of Contact. The invitation will be sent out Monday, February 11th, 2013. The survey will be open from Monday, February 11th, 2013 to midnight ET, Friday, February 15th, 2013. Your input will be anonymous.

Thank you for your participation.
